Vol II

Great Modern Composers

By

Daniel Gregory Mason

(*From Prefatory Note*)

This book is intended as a sequel to "The Appreciation of Music" Vol I (see above). That volume carried the study of music from early times up to the death of Beethoven (1827); the present volume takes it up there and carries it through the most important of the Romantic Composers and the composers of program music down to the present day, ending with studies of the two most widely accepted living musicians, Strauss and Debussy.

The Modern Organ

By

Ernest M. Skinner

This book will prove a boon to two classes of persons in particular:

1st. To organists and organ students, who should have a thorough knowledge of the construction and modern development of the instrument.

2nd. To the purchasing committees, who have so many thousands to spend, an uneasy sense of responsibility, and complete ignorance of the subject.

No one is better fitted for the writing of such a treatise to-day than Mr. Skinner, who, in addition to his special gifts and experience as an organ builder, possesses a clear and vigorous style.

Illustrated with diagrams, photographs, etc.

How to Write Music

By

C. A. Harris

Many young musicians who seek to express their musical ideas find themselves shaky on various points in notation. And advanced musicians, especially in view of the growing complexity of modern composition, need to study the clearest form in which to present their meanings, and so lessen the performer's task, to their mutual benefit.
