Report of the Work of M. CAUSSINUS, by the Committee on Music of the Academy of Fine Arts.

Gentlemen :—At the request of the Minister of the Interior, the Committee on Music has the honor to report the result of the examination which you ordered them to make on the Progressive Method of M. Caussinus for teaching the Cornet, Saxhorn, Valve-Trumpet, etc., lately introduced by the Minister of War, for military bands.

The work of Mr. Caussinus is divided into two parts :—

First,—The detailed description of the instruments named, the fingering of which is the same as the Cornet, although they differ in shape and sound. Military pupils, who may be called to make use of several of them, will find it of great advantage to have united in the same method all that is necessary for their studies. After having, in a progressive series of his solfeggio lessons, treated of musical theory, of the formation of sounds, of the scale in all the keys used, of intervals and their inversions, and of transpositions,—the author ends the first part by tables and exercises for the reading of both the natural and artificial fingering, and by exercises in triplets of eighth-notes, taking up the different forms of the scale, with the comparison of these triplets to simple eights.

Second,—He presents the various difficulties of the tonguing ordinarily used for trumpet calls and phrasing. Two tables show the different fingering, natural and artificial, for turns, trills, and candenzas. The last lessons are preceded by preparatory exercises which show the division of value used.

The work ends with what are known as classical studies, which serve to prepare the pupil to execute the most difficult fingering and articulation. The author has even gone so far as to mark by signs, in each lesson, the breathing places essential to good phrasing.

Mr. Caussinus has been a military man. His great skill as teacher and performer is generally acknowledged. He has produced many excellent performers. Knowing well all the instruments lately introduced, he could, better than any other person, facilitate their study. By his Method, which is very clear and concise, he has rendered a service which merits the approval of the Academy.
